INDEPENDENT AUDITORS' REPORT

To the Board of Directors
The University of Texas Investment Management Company
Austin, Texas

We have audited, in accordance with auditing standards generally accepted in the United States of America, the financial statements of the Permanent University Fund (PUF) for the year ended August 31, 2001, and have issued our report thereon dated October 19, 2001. We have also audited the accompanying schedules of equity securities (Schedule A), debt securities (Schedule B), preferred stocks and convertible securities (Schedule C), and cash and cash equivalents (Schedule D) as of August 31, 2001. These schedules are the responsibility of the PUF's management. Our responsibility is to express an opinion on these schedules based on our audit.

We conducted our audit in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the schedules referred to above are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the schedules. Our procedures included confirmation of securities owned as of August 31, 2001, by correspondence with the custodian. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall schedule presentation. We believe that our audit provides a reasonable basis for our opinion.

In our opinion, such schedules present fairly, in all material respects, the PUF's par value, shares, value and cost of investments as shown in the accompanying Schedules A through D as of August 31, 2001, in conformity with accounting principles generally accepted in the United States of America.

PERMANENT UNIVERSITY FUND

Notes to Detail Schedules of Investment Securities

Note 1 – Organization

The Permanent University Fund (PUF) is a state endowment contributing to the support of eligible institutions of The University of Texas System (U.T. System) and the Texas A&M University System (TAMU System). The PUF was established in the Texas Constitution of 1876 through the appropriation of land grants previously given to the University of Texas plus one million acres. Additional land grants to the PUF were completed in 1883 with the contribution of another one million acres. Today, the PUF contains over 2.1 million acres of land located in 24 counties primarily in West Texas (PUF Lands).

PUF Lands produce two streams of income: mineral and surface. Mineral income is contributed to the PUF and surface income is distributed to the Available University Fund (AUF). The investments of the PUF are managed by The University of Texas Investment Management Company (UTIMCO). The PUF Lands are managed by U.T. System administration.

Note 2 – Significant Accounting Policies

(A) **Security Valuation** -- Investments are primarily valued on the basis of market valuations provided by independent pricing services.

Fixed income securities held directly by the PUF are valued based upon prices supplied by Merrill Lynch Securities Pricing Service and other major fixed income pricing services, external broker quotes and internal pricing matrices.

Equity security market values are based on the New York Stock Exchange composite closing prices, if available. If not available, the market value is based on the closing price on the primary exchange on which the security is traded (if a closing price is not available, the average of the last reported bid and ask price is used).

Limited Partnerships and Other are valued based on a fair valuation determined as specified by policies established by the UTIMCO Board of Directors.

Securities held by the PUF in index funds are generally valued as follows:

Stocks traded on security exchanges are valued at closing market prices on the valuation date.

Stocks traded on the over-the-counter market are valued at the last reported bid price, except for National Market System OTC stocks, which are valued at their closing market prices.

Fixed income securities are valued based upon bid quotations obtained from major market makers or security exchanges.

Commingled funds are valued based on the net asset value per share provided by the investment company.

(B) **Foreign Currency Translation** -- The accounting records of the PUF are maintained in U.S. dollars. Investments in securities are valued at the daily rates of exchange on the valuation date.

PERMANENT UNIVERSITY FUND

Notes to Detail Schedules of Investment Securities (cont.)

(C) **Security Transactions** -- Security transactions are recorded on a trade date basis for most securities. International index fund transactions are recorded on a settle date basis due to trading practices which impose restrictions in acquiring per unit information on the trade date. Gains and losses on securities sold are determined on the basis of average cost. A loss is recognized if there is an impairment in the value of the security that is determined to be other than temporary. Security classifications in the detail schedules of investment securities are based on currency.

(D) **Use of Estimates** -- The preparation of the accompanying schedules in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets at the reporting date. Actual results could differ from these estimates.

Note 3 – Index Funds

The index funds, managed by the same investment manager, consist of several funds with different investment objectives, as follows:

The Equity Index Fund B Lendable is a portfolio of common stocks with the objective of approximating as closely as practicable the capitalization weighted total return of that segment of the U.S. market for publicly traded common stocks represented by the larger capitalized markets. The fund tracks the S&P 500 Index.

The Mid-Cap Index Fund B Lendable is a portfolio of common stocks with the objective of approximating as closely as practicable the capitalization weighted total rate of return of the segment of the United States and Canadian markets for publicly traded common stocks represented by the medium capitalized companies. The fund tracks the S&P Mid-Cap 400 Index.

The Provisional EAFE Equity Index is a temporary fund established to accommodate the reconstitution of the current MSCI EAFE Index (Morgan Stanley Capital International Europe, Australia and Far East Index). The MSCI EAFE does not fully represent the international equity markets and is being reconstituted to create a more representative benchmark. The Provisional EAFE Index will be folded into the standard MSCI Index upon completion of the reconstitution and final transition in May 2002.

The Russell 2000 Index Fund B's objective is approximating as closely as practicable the capitalization weighted total return of the segment of the U.S. market for publicly traded common stocks represented by the Russell 2000 Index.

When deemed appropriate, a portion of the index funds may be invested in futures contracts for the purpose of acting as a temporary substitute for investment in common stocks.

The Mid-Cap Index Fund B Lendable is majority-owned by the PUF and The General Endowment Fund.

Note 4 – Commingled Investments

The commingled investments consist of investments in other entities in which the PUF has an ownership percentage, shares or limited partnership interest. The investments include emerging market mutual funds, small capitalization international stock fund, merger arbitrage and special situation funds, and hedge fund.

PERMANENT UNIVERSITY FUND

Notes to Detail Schedules of Investment Securities (cont.)

The merger arbitrage and special situation funds invest in merger arbitrage, corporate restructuring, distressed investments, distressed convertibles and liquidations. The hedge fund invests primarily in medium and large capitalization U.S. equities in which performance is driven by long and short security selection with a low net exposure to market risk.

Note 5 – Securities Lending

The PUF loaned securities to certain brokers who paid the PUF negotiated lenders' fees. The PUF receives qualified securities and/or cash as collateral against the loaned securities. The collateral, when received, will have a market value of 102% of loaned securities of United States issuers and a market value of 105% for loaned securities of non-United States issuers. If the market value of the collateral held in connection with loans of securities of United States issuers is less than 100% at the close of trading on any business day, the borrower is required to deliver additional collateral by the close of the next business day to equal 102% of the market value. For non-United States issuers, the collateral should remain at 105% of the market value of the loaned securities at the close of any business day. If it falls below 105%, the borrower must deliver additional collateral by the close of the following business day. The value of securities loaned and the value of collateral held are as follows at August 31, 2001:

Securities on Loan	Value	Type of Collateral	Value of Collateral
U. S. Government	\$ 80,982,141	Cash	\$ 82,292,650
Foreign Government	215,358	Cash	226,600
Corporate Bonds	31,743,769	Cash	32,512,670
Common Stock	<u>18,316,410</u>	Cash	<u>19,365,434</u>
Total	<u>\$ 131,257,678</u>	Total	<u>\$ 134,397,354</u>
U. S. Government	<u>\$ 2,462,280</u>	Non-Cash	<u>\$ 2,732,188</u>

Cash received as collateral for securities lending activities is recorded as an asset with an equal and offsetting liability to return the collateral. Investments received as collateral for securities lending activities are not recorded as assets because the investments remain under the control of the transferor, except in the event of default.

Note 6 – Commitments

The PUF had unfunded contractual commitments for Limited Partnerships and Other assets of \$506,269,569 as of August 31, 2001.
