PERMANENT UNIVERSITY FUND

DETAIL SCHEDULES OF INVESTMENT SECURITIES

Year Ended August 31, 1999

**INDEPENDENT AUDITORS' REPORT**

To the Board of Directors
The University of Texas Investment Management Company
Austin, Texas

We have audited, in accordance with generally accepted auditing standards, the financial statements of the Permanent University Fund (PUF) for the year ended August 31, 1999, and have issued our report thereon dated October 29, 1999. We have also audited the accompanying schedules of debt securities (Schedule A), preferred stocks and convertible debentures (Schedule B), equity securities (Schedule C), cash and cash equivalents (Schedule D), Equity Index Fund B Lendable (Schedule E) and Mid Cap Index Fund B Lendable (Schedule F) as of August 31, 1999. These schedules are the responsibility of the PUF's management. Our responsibility is to express an opinion on these schedules based on our audit.

We conducted our audit in accordance with generally accepted auditing standards. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the schedules referred to above are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the schedules. Our procedures included confirmation of securities owned as of August 31, 1999, by correspondence with the custodian. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall schedule presentation. We believe that our audit provides a reasonable basis for our opinion.

In our opinion, such schedules present fairly, in all material respects, the PUF's par value, shares, cost and value of investments as shown in the accompanying Schedules A through F as of August 31, 1999, in conformity with generally accepted accounting principles.

PERMANENT UNIVERSITY FUND

Notes to Investment Schedules

Note 1 -- Organization

The Permanent University Fund (PUF) is a state endowment contributing to the support of eligible institutions of The University of Texas System (U. T. System) and The Texas A&M University System (TAMU System). The PUF was established in the Texas Constitution of 1876 through the appropriation of land grants previously given to the University of Texas plus one million acres. Additional land grants to the PUF were completed in 1883 with the contribution of another one million acres. Today, the PUF contains 2,109,190 acres located in 24 counties primarily in West Texas.

The investments of the PUF are managed by The University of Texas Investment Management Company (UTIMCO). The accompanying investment schedules include only investments of the PUF which are managed by UTIMCO. The PUF's 2.1 million acres of West Texas land is not included in this report.

Note 2 -- Significant Accounting Policies

(A) *Security Valuation* - Investments are primarily valued on the basis of market valuations provided by independent pricing services.

Fixed income securities directly held are valued based upon prices supplied by Merrill Lynch Securities Pricing Service and other major fixed income pricing services, external broker quotes and internal pricing matrices.

Equity investment market values are based on the New York Stock Exchange composite closing prices, if available. If not available, the market value is based on the closing price on the primary exchange on which the security is traded (if a closing price is not available, the average of the last reported bid and ask price is used).

Limited Partnerships and Other are valued based on a fair valuation determined as specified by policies established by the UTIMCO Board of Directors. At August 31, 1999, certain conditions existed that warranted an adjustment to several limited partnerships and one direct investment which was not specifically addressed by the Board policy. The policy states that if a direct investment is held by a partnership, the valuation used by the PUF is the price used by the partnership. Additionally, the limited partnership is valued based on the capital account balance at the closest available reporting period, as communicated by the general partner, adjusted for intra valuation date contributions and withdrawals. There were two significant sales that were consummated prior to the PUF's year end but were not reflected in the general partners' June 30, 1999 financial statements. Accordingly, valuation adjustments were made to more accurately reflect the market value of these investments at August 31, 1999. Proceeds from the sales of these investments were received in September 1999.

PERMANENT UNIVERSITY FUND

Notes to Investment Schedules (cont.)

Securities held in index funds are generally valued as follows:

Stocks traded on security exchanges are valued at closing market prices on the valuation date.

Stocks traded on the over-the-counter market are valued at the last reported bid price, except for National Market System OTC stocks which are valued at their closing market prices.

Fixed income securities are valued based upon bid quotations obtained from major market makers or security exchanges.

(B) *Security Transactions* - Security transactions are accounted for on a trade date basis for most securities. International index fund transactions are recorded on a settle date basis due to trading practices which impose restrictions in acquiring per unit information on the trade date. Gains and losses on securities sold are determined on the basis of average cost. A loss is recognized if there is an impairment in the value of the security that is determined to be other than temporary.

(C) *Use of Estimates* - The preparation of financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from these estimates.

Note 3 -- Securities Lending

The PUF loaned securities to certain brokers who paid the PUF negotiated lenders' fees. These fees are included in investment income. The PUF receives qualified securities and/or cash as collateral against the loaned securities. The collateral when received will have a market value of 102% of loaned securities of United States issuers and a market value of 105% for loaned securities of non-United States issuers. If the market value of the collateral held in connection with loans of securities of United States issuers is less than 100% at the close of trading on any business day, the borrower is required to deliver additional collateral by the close of the next business day to equal 102% of the market value. For non-United States issuers, the collateral should remain 105% of the market value of the loaned securities at the close of any business day. If it falls below the 105%, the borrower must deliver additional collateral by the close of the following business day.

The value of securities loaned and the value of collateral held as of August 31, 1999 are as follows:

Securities on Loan	1999 Value	Type of Collateral	1999 Value of Collateral
-------------------------------	-----------------------	-------------------------------	---

PERMANENT UNIVERSITY FUND

Notes to Investment Schedules (cont.)

U.S. Government	\$ 376,230,804	Cash	\$383,425,026
